#### A SOLDIER "TRIG" CLASS

Educational classes at the Army Y. M. C. A. huts are proving popular with the soldiers. Thousands of young men who left school to go into the service are continuing their studies and classes while in the army. Many educational institutions are arranging to give credit for the work done in this way, so that students may not lose anything while serving their country, and can resume their studies on their return, with credit toward degrees and graduation for the class-room work in the army. The picture shows a group of college men continuing their study of trigonometry at one of the Y. M. C. A. schools. It will make them better artillerymen.

In addition to advanced classes, the Y. M. C. A. conducts classes for illiterates and foreigners, teaching them to read, write and speak the English language. The War Department is giving the Army Y. M. C. A. hearty co-operation in this work.

The "trig" class shown in the picture is one of the many educational classes conducted by the Y. M. C. A. at Camp McArthur, Texas.

## NO EXTRA CHARGE

of the 1-2 cent a mile extra fare for traveling in Pullman cars ordered to the normal one-way fare required take effect December 1. This will reduce the trip to California in a stand-sleeping cars will be abolished. This ard Pullman \$15 and in a tourist car means a reduction of 1-2 cent per

## Unlike Topsy-Swift & Company Has Not "Jest Growed"

Swift & Company, in fifty years of well ordered growth, has become one of the great national services because it has learned to do something for the American people which they needed to have done for them, in the way in which they preferred to have it done.

It has met each successive demand, in the changing conditions of national life, by getting good meat to increasing millions effectively, efficiently, economically, and expeditiously.

The Swift & Company packing plants, . refrigerator cars, car routes, branch houses, organization, and personnel of today are the practical solutions, born of practical experience, to the food problems' of half a century.

Because of all these elements working in correlation and unison, Swift & Company is able to supply more and better meat to more people than would have been possible otherwise, at a net profit per pound of meatso low (a fraction of a cent) that the consumer price is practically unaffected.

Strip away any portion of this vast, smooth-running human machine, and you make a large part of the meat supply uncertain, lose the benefit of half a century of fruitful experience, and scatter the intelligent energies of men who have devoted a life work toward meeting the needs of a nation in one vital field.

> The booklet of preceding chapters in this story of the packing industry will be mailed on request to Swift & Company, Union Stock Yards, Chicago, Illinois.

Swift & Company, U.S.A.
